DESCRIPTION AND RATING

2AF4 Triode. Identical to the 6AF4 except for heater ratings and addition of a controlled heater-warm-up characteristic. Refer to the 6AF4 Description and Rating sheet for complete data.

2AF4-A Triode. Identical to the 6AF4-A except for heater ratings and addition of a controlled heater-warm-up characteristic. Refer to the 6AF4-A Description and Rating sheet for complete data.

2BN4 Triode. Identical to the 6BN4 except for heater ratings and addition of a controlled heater-warm-up characteristic. Refer to the 6BN4 Description and Rating sheet for complete data.

2CY5 Tetrode. Identical to the 6CY5 except for the following ratings:
   - Heater Voltage, AC or DC................................. 2.4 Volts
   - Heater Current............................................. 0.6 ±6% Amperes
   - Heater Warm-up Time*..................................... 11 Seconds

* The time required for the voltage across the heater to reach 80 percent of its rated value after applying 4 times rated heater voltage to a circuit consisting of the tube heater in series with a resistance equal to 3 times the rated heater voltage divided by the rated heater current.

Refer to the 6CY5 Description and Rating sheet for complete data.
