NOTES:
1. Visual extinction of undeflected focused spot.
2. For JETEC focusing 109 or equivalent, three and one quarter inches from reference line.
DIAGRAM NOTES:
1. Reference line is determined by position where JETEC reference line gauge No. 112 will rest on the bulb cone.

WARNING:
X-ray radiation shielding may be necessary to protect against possible danger of personal injury from prolonged exposure at close range if this tube is operated at higher than the manufacturer's Maximum Rated Anode Voltage or 16,000 volts, whichever is less.
